

Hakizimana Leogad

Embedded Systems Developer · IoT Engineer

Kigali, Rwanda | hakizimanaleogad@gmail.com | github.com/leo-gad123 | linkedin.com/in/leogadhakizimana

Profile

Passionate Embedded Systems Developer focused on designing intelligent hardware solutions, IoT systems, and automation technologies that solve real-world challenges. I build devices that bridge the physical and digital worlds — from sensor networks to autonomous robotics.

Core Skills

- Embedded Systems Development (Arduino, ESP32, Raspberry Pi)
- IoT Solutions & Sensor Networks
- Electronics Prototyping & PCB Design
- C / C++ / Python for microcontrollers
- Automation & Robotics
- Machine Learning (applied to embedded devices)

Experience

Embedded Systems & IoT Engineer — Independent / Freelance

Design and deliver custom embedded solutions: IoT sensor networks, automation controllers, and microcontroller-based prototypes. Work across firmware, hardware integration, and cloud connectivity.

Education

Electronics & Embedded Systems — Kigali, Rwanda
